ELARA™ FR-345-EST

The Elara brand customer profile:

- Driven by regulations
- Mid-range price
- Networked deployments

Fixed Radiometric

320 x 240 resolution

45° Horizontal FOV

Designed for EST applications

CORE MESSAGE KEY VALUES

FLIR Elara™ FR-345-EST

What?

- Affordable, fixed-mount radiometric camera

Why?

- Used in medium to high throughput entry control points to accurately measure skin temperature when entering a facility

How is it different from other FLIR solutions for skin temperature screening?

- **On-edge, intelligent face detection** prompts the interactive screen to alert an individual when they need to remove glasses, while also guiding them to the correct position for best measurement.
- The non-contact camera automatically locates and measures the **inner canthus** (corner of the eye) within one second and provides an instant pass/fail graphic to the individual.
- **Integration with VMS systems** further streamlines workflow and decision-making for facilities, while helping security personnel maintain a safe distance from potential health risks.

APPLICATION OVERVIEW

APPLICATION OVERVIEW

CONFIGURATION

CONFIGURATION

The screenshot shows a web browser window displaying the FLIR configuration interface. The browser's address bar shows a local IP address: 192.168.255.93. The page has a header with the FLIR logo and a 'Help | Logout' link. Below the header is a navigation bar with tabs: NETWORK, DATE & TIME, USERS, ALARM, I/O DEVICES (selected), CYBER, BORESIGHT, and FIRMWARE & INFO. The main content area is titled 'Default Product' and 'Rules'. It contains a table with three rows of rules:

Rule Name	Status
Output On Normal Temp	ENABLED
Output On Elevated Temp	DISABLED
Output On Bad Temp	DISABLED

At the bottom of the page, there is a 'BACK TO VIEW SETTINGS' link on the left and 'DISCARD CHANGES' and 'SAVE' buttons on the right. The Windows taskbar is visible at the bottom of the screen.
